DETAILED ACTION

Response to Amendment

This Office Action is in response to the After Final amendment filed on December 18, 2006. Applicant has cancelled the rejected claims and fixed the minor informality in claim 9 to put the case in condition for allowance.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows merely to correct a minor informality:

Claim 10, line 2: Insert – of – between “generation” and “TENS”.

Allowable Subject Matter

Claims 9-14 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding independent claim 9, Dev (U.S. PGPub 2002/0099323 A1) discloses the structure and inherent capability of the generator and applicator electrodes as claimed. Dev and the prior art, however, do not disclose or suggest the generator and

applicator electrodes in combination with a TENS system as claimed. Furthermore, since the device of Dev is for drug delivery, there is no motivation or suggestion in the prior art to combine Dev with a TENS system.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
